

Gin trash

- Usually free with exception of transportation
- Can be dusty and bulky for transport
- Nutritional value varies greatly
- Not fed as primary feed
- Often used as a roughage source
- Best used as a hay replacer in mixed rations for dry pregnant cows

On average:
85% dry matter
45% TDN
12% CP
0.90% calcium
0.12% phosphorous
