

# Hominy

- Degermed corn product from corn meal processing
- Feed value is considered to be equal to corn
- Slightly higher in protein than corn
- Finely ground – works well for mixing with other ingredients

On average:  
90% dry matter  
90% TDN  
11% CP  
0.03% calcium  
0.48% phosphorous

## Feeding Considerations

- In general, can be substituted for corn in beef cattle diets
