

# Rice mill feed

- Rice hulls and rice bran mixed make rice mill feed
- Nutritive value is variable – depends on the amount of rice hulls vs. rice bran in the mix
- Handling is difficult – usually finely ground
- Founder is a risk when fed at high levels
- Less expensive than rice bran and usually longer storage life

On average:  
90% dry matter  
42% TDN  
6% CP  
0.07% calcium  
1.70% phosphorous
