

# Sorghum (milo)

- Starch-based energy supplement
- Unprocessed grain has relatively slower ruminal fermentation rate than other grains
- Processing improves digestibility
- One of the most effective methods for doing this is steam-flaking

On average:  
82% dry matter  
90% TDN  
11% CP  
0.03% calcium  
0.32% phosphorous
