

Soybean hulls (loose or pelleted)

- Good fiber-based energy supplement
- Highly digestible and palatable feed
- High in calcium but low in phosphorus
- Can be dusty – best if mixed with molasses or silage to reduce dustiness

On average:
90% dry matter
75% TDN
12% CP
0.55% calcium
0.20% phosphorous

Feeding Considerations

Feed at no more than 1% of animal body weight per day

- Watch for bloat
