

**SOIL TESTING LABORATORY**  
**Soil Sample Information Form**  
 Department of Agronomy and Soils

Please complete this form and include it with your sample and payment. **Standard turnaround time is 2-3 days.**  
 For additional information, please review the back of this form or visit us online.

**PAYMENT INFORMATION** *Please enclose payment with this form (do not send cash).*

**Number of Samples** \_\_\_\_\_ *There is a \$7<sup>00</sup> charge per sample.*

**Total Payment \$** \_\_\_\_\_

\_\_\_ Check or Money Order *(please make checks payable to Auburn University–Soil Testing Lab)*

Check Number: \_\_\_\_\_

\_\_\_ Credit Card *(please complete section on back of this sheet)*

\_\_\_ Online Payment–Reference #: \_\_\_\_\_

## PROCEDURE FOR TAKING SOIL SAMPLES

**NOTE: Soil tests results can be no better than the soil sample itself.** For a soil test to be of benefit, the sample must represent the area sampled. Proper collection of samples is **extremely** important. **Be sure to read instructions below before taking samples.**

1. Soils that differ in appearance, plant growth, or past treatment should be **sampled separately**. One sample can represent only one soil condition. Even when the area is small, if the plants are growing well in most of the area but poorly in a spot, collect a sample from the poor spot and another from the good area so that lime and fertilizer recommendations may be made for both areas.
2. Avoid taking samples that include organic residue or recently applied fertilizer. Do this by scraping the spots clean before sample is taken. **Potting soils, bark mixes, composts, litters, and manure require different analyses.**
3. Each sample should be a mixture of subsamples from at least 10 or more places in each area. Areas treated differently should be sampled separately. For field crops, a single sample should not represent more than about 10 acres. For cultivated areas, sample to the depth of plowing, usually about 6–8 inches. For established pastures, hayfields, and lawns, sample the top 2–3 inches of soil. **Wet samples should be sent in plastic bags.**
4. **Label** each container with the sample number or name. Keep a record for yourself of the area represented by each sample number or name.
5. Give information requested on reverse side of this sheet.
6. **Make check payable to: Auburn University–Soil Testing Lab**
7. Enclose samples, information sheet, check and mail to:

Soil Testing Laboratory  
ALFA Agricultural Services & Research Building  
961 S. Donahue Drive  
Auburn University, AL 36849-5411  
Telephone: (334) 844-3958  
[www.aces.edu/soiltest](http://www.aces.edu/soiltest)  
[soiltest@auburn.edu](mailto:soiltest@auburn.edu)

8. Test results and recommendations will normally be mailed within 3–7 days from the time the samples are received.  
**Do not use this form for nematode soil samples. Nematode sample forms are available at <http://www.aces.edu/dept/plantdiagnosticlab>.**
